3468 Pre-Study  
Proposal, cien...

Valerie,

Attached is the pre-study proposal for the upcoming long term Series K study (EHCK6/02/03, AA03468). As you mentioned below, please review and let me know if you have any comments or changes. The only difference from previous pre-study agreements is the number of subjects to be recruited. Since this study will only need to randomize 90 subjects, only 300-400 subjects will need to be recruited, thus lowering the recruiting costs.

After final version is accepted by you, I will hopefully be able to complete an internal review (Mark) have a MDS VP sign and get it into the mail this afternoon for tomorrow delivery.

Lastly, Kelli has created the print and radio advertising for this study. I will get that to you shortly, for approval.

Thanks  
Kim

Kim:  
Thanks for your voice mail. I will update the table to reflect that recruiting start will change from 9/8 to 9/13.

Re the proposal - why don't you go ahead and email it to me early Thursday. I'll take a look at it and make sure there aren't any questions or changes needed. I'll let you know by early afternoon if it's ok. Then you can get hard copy originals sent out to us overnight. In order to get Hans' signature, I'll need to have the signed originals from MDS on Friday (he's on vacation next week). As back-up, I could get our VP's signature, but my preference would be to have it available for Hans.

If there are any issues with the above approach, please call me on Thursday morning.

Hope you got some rest. Like you, I could use some myself!

-Valerie
